

# Volunteers needed!

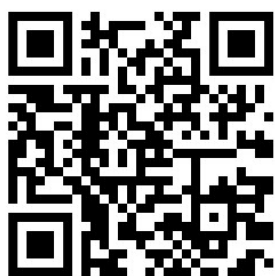

We are looking for volunteers to take part in a study looking at the use of the shingles vaccine (Shingrix), at the same time as the seasonal flu vaccine or as the bivalent COVID-19 booster.

If we could give the shingles vaccine at the same time as either the flu or COVID-19 vaccine it may make it easier for people, and for GPs, as fewer appointments would be needed.

This study is being run by the Bristol Trials Centre (BTC), which is part of the University of Bristol, in partnership with study sites across England. This study is sponsored by University Hospitals Bristol and Weston NHS Foundation Trust.

## Further Information

If you are interested in finding out more, please visit our website or scan the QR code below to access the Participant Information leaflet.
